

IST Investmentstiftung

We are looking for an experienced, motivated and self-driven Asset Manager (m/f) with experience in the field of renewable energies on a full-time basis. As an Asset Manager, you will play a pivotal role in ensuring the effective operation, performance, and long-term financial success of our assets. Your responsibilities will include overseeing the day-to-day operations, managing stakeholders and service providers, lifecycle and re-contracting initiatives, and maximizing availabilities and performance.

We offer an exciting and broad role in a complementary and growing team of highly qualified and committed individuals who have been able to establish IST3 INFRASTRUKTUR GLOBAL as a successful market participant within a few years. The fund invests worldwide into infrastructure assets in all sub-sectors (incl. telecom, energy transmission, energy generation, social infra, water systems and transportation), with a focus on regulated or contracted cash flows. IST manages approximately CHF 10bn in AuM for around 460 Swiss pension funds through a variety of traditional and alternative investment products. IST3 INFRASTRUKTUR GLOBAL is IST's flagship infrastructure offering.

Asset Manager Renewable Energies (m/f)

Responsibilities:

- Asset owner role for renewable energy assets (majorities and minorities) and other infrastructure assets (minorities), with focus on commercial, financial and technical aspects
- Monitor and optimize the performance of assets to maximize energy and revenue generation
- Collaborate with service providers to develop and execute preventive maintenance and lifecycle strategies, ensuring minimal downtime and maximum asset performance
- Identify opportunities for operational improvement, cost reduction, and revenue enhancement across the portfolio
- Manage contracts (incl. PPAs), agreements, insurance policies, and relationships with various stakeholders, including suppliers, contractors, and regulatory bodies in coordination with technical and commercial service providers
- Prepare and present regular reports on asset performance, financial metrics, and operational insights to management
- HSE oversight and managing of IST internal HSE committee
- Supporting the acquisitions team from a technical/ commercial perspective with the due diligence of new opportunities/ involvement in recurring valuations

Qualifications and Skills:

- Minimum of 10 years of experience in asset management, specifically in the renewable energy, or private infrastructure sector
- Strong understanding of renewable energy technologies and their operational characteristics (familiarity with SCADA systems or other monitoring tools is a plus)
- Excellent analytical skills with the ability to interpret complex data and make informed decisions
- Ability to synthesize technical, commercial, and financial aspects of an asset
- Knowledge of relevant regulations, compliance standards, and environmental policies
- Results-driven mindset with a focus on continuous improvement and innovation
- Exceptional communication and interpersonal skills, and the ability to work effectively with internal and external stakeholders
- Master's degree in finance, engineering, or a related field

If you are passionate about infrastructure and have a proven track record of asset management success, we invite you to apply for this exciting opportunity. Please submit your resumé (incl. references, motivation letter, diploma, and a picture) electronically to Martin Ragetti (martin.ragetti@istfunds.ch [↗](#)). We are looking forward to receiving your application.

Please note that we will only reply to applications which fulfill the aforementioned qualifications and criteria.
